

## Medical Accessories Support Trust (MAST)

- Did you know that thousands of people live with one or more medical appliances / devices on their body?
- Most lie out of sight, underneath clothing, but all require a care routine and can need urgent access.
- If you see someone accessing a disabled toilet or parking space etc, don't assume you can assess their need just by looking...

**...Not all disabilities are visible.**

What Lies Beneath Card

Some appliances and devices people may be caring for...

**Feeding Tube**

A tube placed between the body surface & an organ in the GI tract

**Stoma / Ostomy**

An opening between a hollow organ & the body surface (w/wo pouch)

**Central Venous Line**

An intravenous line placed in a major vein close to the heart

**Catheter**

A hollow tube placed in the bladder
